CPU HOLDERS

AN IDEAL ERGONOMIC WORKSTATION is built with tools that work together to improve the health and comfort of computer users. While products such as task chairs and monitor arms are essential, additional components such as thin clients and CPU holders can further improve workstation ergonomics. Designed to attach under the work surface, our CPU holders eliminate worksurface cable clutter while keeping the device safe and off the floor.

Thin Client Holder

As the size of the modern office continues to shrink, the importance of space and organisation remains at the forefront of employee productivity. Thin clients continue to replace traditional CPU towers, and because of their small size, users typically place them directly on the worksurface. This, however, creates unnecessary clutter and visual distractions that ultimately effect employee productivity.

Humanscale's Thin Client Holder is an elegant solution. Designed to clear the worksurface, the Thin Client Holder provides easy access by mounting directly underneath the worksurface. Created to accommodate thin clients 25mm (1") – 50mm (2") thick and weighing up to 2.27 kg (5 lbs.), our Thin Client Holder is 100% free of Red List chemicals and is a sustainable, yet simple office solution.

CPU200

Built to accommodate smaller CPU towers, the CPU200 fits CPUs 25mm (1") - 127mm (5") in width and 152mm (6") - 305mm (12") in height and accommodates CPUs up to 6.8 kg (15 lbs.).

Similar to its larger counterpart, the CPU200 has an under-desk track mount with 360-degree swivel capability and is made with 48% recycled and 99% recyclable content. Finish options for the CPU200 include Black with Brushed Aluminium or White with Brushed Aluminium.

CPU600

The CPU600 is the perfect marriage of form and function. Featuring an under-desk track mount with 360-degree swivel capability, the CPU600 is built for larger CPU towers and allows for easy access to ports, drives, and cables. The CPU600 fits CPUs 89mm (3.5") - 228mm (9") wide & 305mm (12") - 500mm (20") tall, weighing 22.6 kg (50 lbs.).

Made predominantly of recycled aluminum and steel, the CPU600 is 99% recyclable and contains over 50% recycled content by weight. Designed to allow for quick hardware upgrades and repairs, the CPU600 saves time by offering tool-free installation. Available in Black with Brushed Aluminium or a White with Brushed Aluminium finish, it provides the perfect complement to any workstation.

Specifications

	Thin Client Holder	CPU 200	CPU 600
Accommodates	Thin Clients 25mm (1") – 50mm (2") Thick	CPU Towers 25mm (1") - 127mm (5") Wide, 152mm (6") - 305mm (12") Height	CPU Towers 89mm (3.5") - 228mm (9") Wide 305mm (12") - 500mm (20") Tall
Weight Capacity	Up to 2.27 kg (5 lbs.)	Up to 6.8 kg (15 lbs.)	Up to 22.6 kg (50 lbs.)
Mounting Orientation	Horizontal	Vertical	Vertical
Swivel Capability	None	360°	360°
Finish	Black	Black/ Brushed Aluminium or White/ Brushed Aluminium	Black/ Brushed Aluminium or White/ Brushed Aluminium
Materials	Steel, ABS, POM, 20% Glass Filled Nylon, Silicone	Aluminium and cold-rolled, powder-coated steel	Aluminium and cold-rolled, powder-coated steel and plastic
Warranty	15 Years	15 Years	15 Years
