DESIGNED BY HOWE IN-HOUSE DESIGN TEAM 2011/2023

USU®

Being value for money, Usu is a foldable, simple table of good design and quality. Its strength and stability allow the table to withstand the test of time under severe contract use, yet not compromising on the table's classic look. Usu is the obvious choice for the price-conscious customer who still requires aesthetics, space-saving attributes, and ease of handling. Solid in use, Usu is quick and intuitive to fold. One person can easily fold the table and handle it without effort. It folds flat, and stacks neatly on a transporter, therefore works perfectly whenever quick and easy refurnish is needed. With elegant lines, and made as simple as possible, Usu is a conscious choice for multipurpose use (education, training, conference, dining, corporate, healthcare). The table's simple and elegant aesthetics make it compatible with other furniture styles.

DESCRIPTION

4-legged stackable folding table for multi-purpose canteen and training applications.

PRODUCT DETAILS

TABLETOPS
LAMINATE VERSION
Laminates of 0,8 mm on both sides. The upper side is coloured, and the underside of the tabletop is white. The total thickness of 18 mm.

Standard coloured laminates:
L310 white, L420 grey, L110 Howe grey, L500 metal slate, L600 stone grey, L210 black.

MELAMINE VERSION
Melamine surface on both sides. The total thickness of 18 mm. The standard melamine finish is white.

EDGES
A standard option is a matching ABS edge on tabletops in laminate and melamine.

BASES
Four-legged bended frame with round tube legs, two castors and two adjustable glides. Legs in round steel tube Ø32 mm. Legs in black, or chrome3. Subframe in black powder coating.

GLIDES & CASTORS
As standard two adjustable glides Ø32 mm made of black nylon (PA6), and two mono-directional castors in black nylon (PA6). The glides are adjustable up to 30 mm height.

MECHANISM

Folding mechanism in steel construction concealed under plastic cover. Release handle in spring-managed steel rod. Legs folds in pairs, flat. Built-in friction to prevent legs for folding out unintendedly.

STACKING CAPACITY

Folded tables have a folding depth of 72 mm. Can be stacked vertically on short and long side, and flat on the floor. They can be neatly stacked on a specially designed transporter (10 rectangular tables).

DIMENSIONS AND WEIGHT

**Due to manufacturing tolerances, actualproduct dimensions may vary slightly from nominal values.*

The height of the table is 730 mm.

STANDARD SHAPES & SIZES
Rectangular:
1200 x 600 mm
1400 x 700 mm
1600 x 800 mm
1800 x 800 mm
1800 x 900 mm

Square:
800 x 800 mm

Round:
Ø1200 mm

WEIGHT
1200 x 600 mm table in laminate weighs 18 kg.
1400 x 700 mm table in laminate weighs 22 kg.
1600 x 800 mm table in laminate weighs 26 kg.
1800 x 800 mm table in laminate weighs 28 kg.
1800 x 900 mm table in laminate weighs 30 kg.
800 x 800 mm table in laminate weighs 17 kg.
Ø1200 mm table in laminate weighs 23 kg.

ACCESSORIES

LINKING BRACKETS in black PA6. For positioning the tables.

RADIAL LINKING. The radial table linking system is designed to securely connect modular tables together while maintaining accurate alignment and a clean continuous surface. Mounted discreetly beneath the tabletop, the mechanism uses a rotating cam-lock design that allows two adjoining tables to be quickly joined without tools.

When the tables are positioned together, the connector engages with the corresponding fitting on the adjacent table. By rotating the central cam, the mechanism pulls the tables tightly together, reducing movement and ensuring consistent spacing and surface alignment. The curved locking action creates a progressive tightening effect, providing a secure and stable connection once fully engaged.

The low-profile construction allows the system to remain hidden during use and avoids interference with folding or nesting table frames. Manufactured from durable die-cast metal.

TABLE TRANSPORTER made of steel frame. Rubber pads for protection. Powder coated in black color. It stores up to 10 rectangular tables, nested on short side. 2 fixed wheels and 2 multidirectional wheels with brake. Safety strap to hold tables in place during transport. Delivered flat packed (pallet size). Easy assembled with 8 screws.

Dimensions - height: 1125 mm, length: 1155 mm, width: 450 mm. The dimensions are without tables on the transporter.

ERGONOMICS & ENVIRONMENT

Enhanced Usu design follows HOWE's Design for Environment protocol. Usu is spacesaving and thus resource saving both during transport and use. It is cleverly designed to be easily disassembled using only a screwdriver.

Usu contains no PVC, which goes for all HOWE products. It is available as FSC® C041311 certified.

TESTS

The table is designed for severe contract use and has been subject to a variety of tests to ensure its highest quality and durability.

The furniture is tested by thirdparty organizations and passed testing according to the required EN and BIFMA standards.

All the certificates are available for access and download here.

WARRANTIES

HOWE a/s gives a 5-year guarantee on all Usu tables against weld breakages, defective material, workmanship and performance under normal use.

For full information please see the warranty provision on howe.com

DELIVERY

Usu table will be offered with the standard lead time (5-7 weeks).

The tables will be shipped as ready to be assembled according to the manual provided. The average time of unpacking and assembly should take less than 10 minutes.
